

What a sight is Nature

Nature is around every season of the year.
Cold, wet, sunny or cloudy ? nature does not care.
It is here now with its lovely flowers for us to adore,
In springtime along come some new animals,
To love and cherish it more.
Autumn, with its falling leaves,
Leads to winter with its bare trees.
No food for birds so they migrate,
To warmer countries for to wait.
In summer time farmers are busy,
Cutting silage and gathering crops.
Without nature, life would be dull,
No flowers, love or happiness would come no more.
